**Catheter Body
Elongation Tensile
Test**

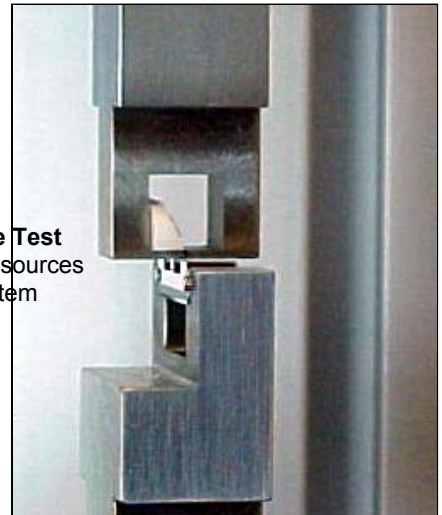

Tested with
TestResources 650M
Test System equipped
with G240K Vise Action
Grips

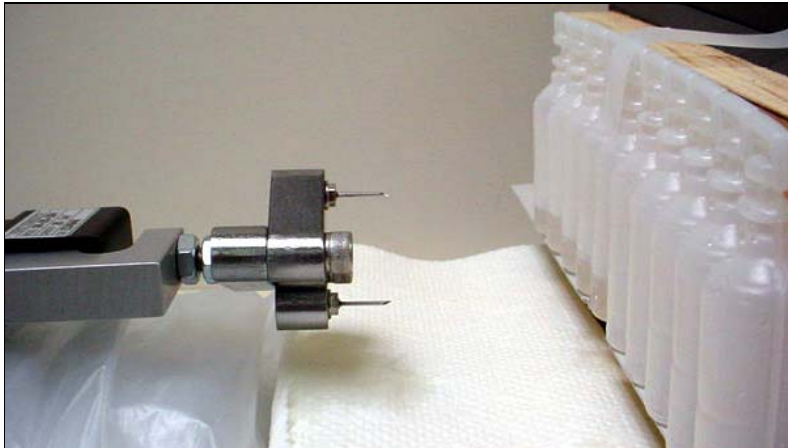

Syringe Test tested using a
TestResources 200R Test System

TestResources **G94**
Lightweight Air Grips
performing tensile tests
on thin film.

Surgical Blade Test
using a TestResources
100Q Test System

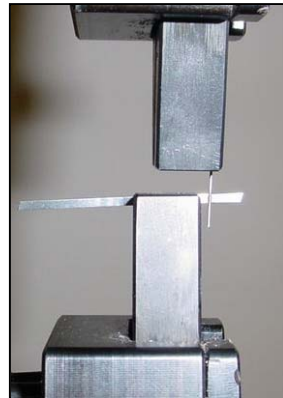

TestResources **200R Test System** mounted horizontally to perform needle puncture tests on bottles used in medical applications.

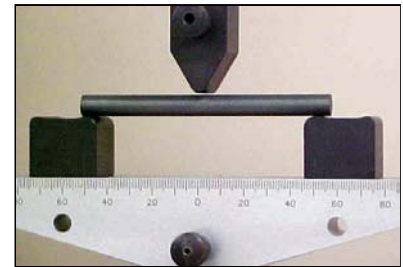

TestResources **G7-1 Roller Capstan Grips** used for lap shear tests on plastics.

TestResources **200R Test System with Collet Grips** perform Catheter Luer Fitting Tensile Strength Test

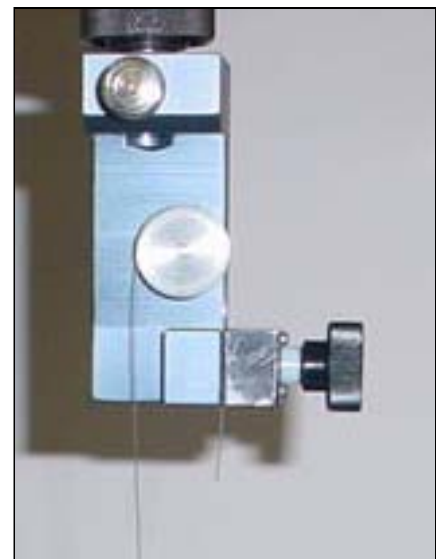

TestResources **G7W Wedge Action Grips** perform low force fatigue tests on welds and solder joints.

TestResources **G238 Bend Fixtures** testing ferrite rods.

TestResources **G240K Vise action grips** performing strength tests on stainless steel foil.

TestResources **G76-1 Fine Wire Capstan Grips** perform strength tests on small diameter wires common to medical devices.
